

HOW TO BUY KEMET COINS

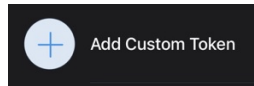

Step 1: Create a Wallet

Download [Trust Wallet](#) and create a wallet. Keep your phrase a secret! Never share it with anyone and store it properly! Make sure to copy this contract address:

0x7c8af9e06d1c06e54bd98d3fb842afb731e0d577

Step 2: Add KEMET to the Wallet

Click the top right icon and scroll down until you see "Add Custom Token"

At the top, tap "Ethereum" next to Network, and change it to "Smart Chain". Copy the contract address on this page and put it in the Contract Address box.

Next, put "KEMET" as the name, the symbol as KMT and 10 decimals.

Click "Done" at the top and you should now have KEMET added to your wallet!

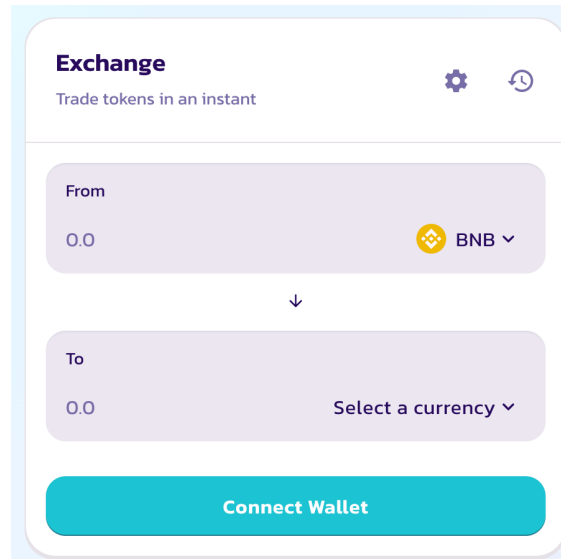

Step 3: Buy "Binance Smart Chain" (BSC)

Tap on "Smart Chain" on the main screen of trust wallet, then tap "Buy" in the top right. This step may require KYC verification, so have documents ready to prove your identity. If the transaction won't go through, you may need to contact your bank to allow international transactions.

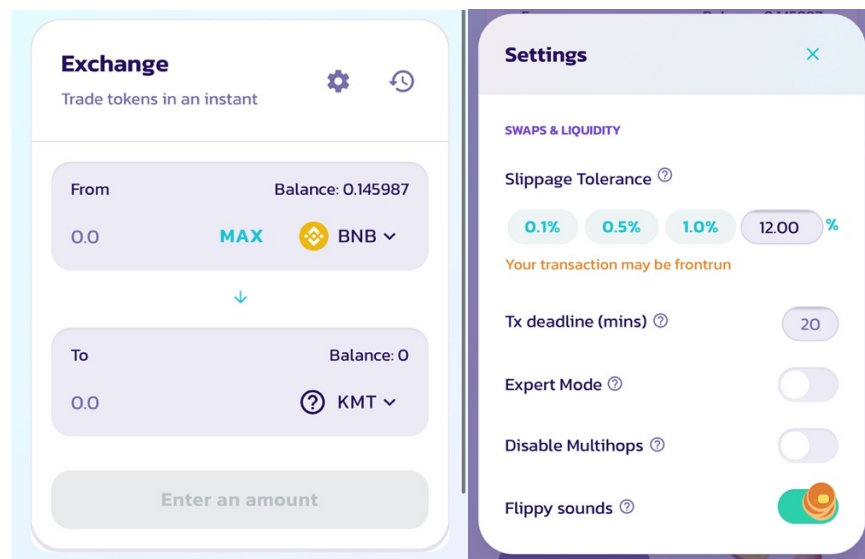

After purchasing, there may be a delay while your transaction is processed. Be patient, this is normal!

Step 4: Swap BNB for KEMET

Once your transaction has been cleared, and you have BSC on your Trust Wallet, Go to <https://pancakeswap.finance/swap>, connect your wallet selecting Trust Wallet and press "Select a currency", then paste the token contract address shown above. Then click "import" and "approve".

You may change the slippage tolerance as well, by clicking the settings icon and changing it to 12%.

That's all! Now enjoy your tokens!
